Appendix RECORDING

RECORDING, MESSAGE PROCESSING AND PROVISION OF INTEREXCHANGE CARRIER TRANSPORTED MESSAGE DETAIL APPENDIX

This Appendix sets forth the terms and conditions under which SWBT will provide recording, message processing and message detail services as described in total in Exhibit I, **SERVICES AND ASSOCIATED CHARGES**, and those services specifically selected by LSP as described in Exhibit II, **SELECTED SERVICE OPTIONS AND METHOD OF PROVISION**, at the rates set forth in Exhibit III, **BASIS OF COMPENSATION**, and Exhibit IV, **PROVISION OF AUR SOURCE INFORMATION**. Exhibits I, II, III, and IV are attached hereto and made a part of this Appendix by reference.

I. DEFINITIONS

As used herein and for the purposes of this Appendix, the following terms shall have the meanings set forth below:

- A. Access Usage Record (AUR) - a message record which contains the usage measurement reflecting the service feature group, duration and time of day for a message and is subsequently used to bill access to Interexchange Carriers (IXCs).
- B. Assembly and Editing - the aggregation of recorded customer message details to create individual message records and the verification that all necessary information required to ensure all individual message records meet industry specifications is present.
- C. Billable Message - a message record containing details of a completed IXC transported call which is used to bill an end user.
- D. Billing Company - the company that bills end users for the charges incurred in originating and terminating IXC transported calls.
- E. Centralized Message Distribution System (CMDS) - the national network of private line facilities used to exchange Exchange Message Records (EMR) formatted billing data between SWBT and the Billing Company.
- F. Data Transmission - the forwarding by SWBT of IXC transported toll message detail and/or access usage record detail in EMR format over data lines or on magnetic tapes to the appropriate Billing Company.
- G. Interexchange Carrier (IXC) - A third party transmission provider that carries long distance voice and non-voice traffic between user locations for a related recurring fee. IXCs provide service interstate and intrastate. In some states IXCs are permitted to operate within a LATA.
- H. Interexchange Carrier Transported - telecommunications services provided by an Interexchange Carrier or traffic transported by facilities belonging to an Interexchange Carrier.

- I. **Originating Local Exchange Carrier Company** - the company whose local exchange telephone network is used to originate calls thereby providing originating exchange access to IXC's.
- J. **Message Processing** - the creation of individual EMR formatted billable message detail records from individual recordings that reflect specific billing detail for use in billing the end user and/or access usage records from individual recordings that reflect the service feature group, duration and time of day for a message, Carrier Identification Code, among other fields, for use in billing access to the Interexchange Carriers. Message Processing includes performing CMDS online edits required to ensure message detail and access usage records are consistent with CMDS specifications.
- K. **Provision of Message Detail** - the sorting of all billable message detail and access usage record detail by Revenue Accounting Office, Operating Company Number or Service Bureau, splitting of data into packs for invoicing, and loading of data into files for data transmission to LSP for those records created internally or received from other Local Exchange Carrier Companies or Interexchange Carriers through SWBT's internal network or national CMDS.
- L. **Rating of Billable Messages** - the computing of applicable charges for each message based on the Interexchange Carrier's schedule of rates.
- M. **Record** - a logical grouping of information as described in the programs that process information and create the magnetic tapes or data files.
- N. **Recording** - the creation and storage on magnetic tape or other medium of the basic billing details of a message in Automatic Message Accounting (AMA) format.
- O. **Recording Company** - the company that performs the functions of recording and message processing of Interexchange Carrier (IXC) transported messages and the provision of message detail.
- P. **Service Switching Point (SSP)** - a signaling point that can launch queries to databases and receive/interpret responses used to provide specific customer services.
- Q. **Switching Control Point (SCP)** - the real time database system that contains routing instructions for 800 calls. In addition to basic routing instructions, the SCP may also provide vertical feature translations, i.e., time of day, day of week routing, out of area screening and/or translation of the dialed 800 number to its assigned working telephone number.
- R. **800 SCP Carrier Access Usage Summary Record (SCP Record)** - A summary record which contains information concerning the quantity and types of queries launched to a SWBT SCP. In those situations where charges are applicable for the production and delivery of SCP records, such charges will be those specified in Exhibit III-A pertaining to the production and forwarding of AUR data.
- S. **Terminating Local Exchange Carrier Company** - the company whose local exchange

telephone network is used to terminate calls thereby providing terminating exchange access to IXCs.

II. RESPONSIBILITIES OF THE PARTIES

- A. SWBT will record all IXC transported messages for LSP carried over all Feature Group Switched Access Services that are available to SWBT-provided recording equipment or operators. Unavailable messages (i.e., certain operator messages which are not accessible by SWBT-provided equipment or operators) will not be recorded. The recording equipment will be provided at locations selected by SWBT.
- B. SWBT will perform assembly and editing, message processing and provision of applicable billable message detail for IXC transported messages if the messages are recorded by SWBT. In those instances where LSP has not signed a rating takeback waiver with AT&T, SWBT will also rate billable message detail and forward to the appropriate billing company. If LSP has signed a rating takeback waiver, SWBT will perform assembly and editing and forward the billable message detail to AT&T for rating on behalf of LSP.
- C. SWBT will provide access usage records if they are generated by SWBT or if source information has been purchased from the IXC on behalf of LSP.
- D. Assembly and editing will be performed on all IXC transported messages recorded by SWBT, or on all source information purchased on behalf of LSP during the billing period established by SWBT and selected by LSP from Exhibit III-B.
- E. Standard EMR record formats for the provision of billable message detail and access usage record detail will be established by SWBT and provided to LSP.
- F. Recorded billable message detail and access usage record detail will not be sorted to furnish detail by specific end users, by specific groups of end users, by office, by feature group or by location.
- G. SWBT will provide message detail to LSP either on magnetic tapes or in data files, depending on the option contracted for by LSP in Exhibit III. Only ONE method may be selected by the LSP.
 - 1. Magnetic Tapes
 - a. SWBT will supply the magnetic tapes, which will be provided without the return of previously supplied tapes.
 - b. LSP will specify one of the following options for provision of tapes:
 - 1) SWBT may send the tapes to LSP via first class U.S. Mail Service or an equivalent service of SWBT's choice, or
 - 2) LSP may pick up the magnetic tapes at a location designated by SWBT.

- 3) If, at the request of LSP, overnight delivery other than those provided in 1 & 2 above is requested, the cost of this delivery will be at the expense of LSP.

2. Data Files

The message detail may be transmitted to LSP in data files via data lines using software and hardware acceptable to both parties.

- H. In Exhibit III LSP will identify separately the location where the tapes and any data transmissions should be sent (as applicable) and the number of times each month the information should be provided. SWBT reserves the right to limit the frequency of transmission to existing SWBT processing and work schedules, holidays, etc.
- I. SWBT will determine the number of magnetic tapes or data files required to provide the recorded billable message detail and access usage record detail to LSP.
- J. Recorded billable message detail and/or access usage record detail previously provided LSP and lost or destroyed through no fault of SWBT will not be recovered and made available to LSP except on an individual case basis at a cost determined by SWBT.
- K. When SWBT receives rated billable messages from an Interexchange Carrier or another Local Exchange Carrier that are to be billed by LSP, SWBT will forward those messages to LSP.
- L. When SWBT has rated billable message detail originating from LSP's end users requiring billing by another Local Exchange Carrier, SWBT will forward such messages to the appropriate Billing Company.
- M. SWBT will record the applicable detail necessary to generate access usage records and forward them to LSP for its use in billing access to the Interexchange Carrier.

III. BASIS OF COMPENSATION

- A. Compensation for recording, assembly and editing, rating, message processing and provision of messages provided hereunder by SWBT for the LSP shall be based upon the rates and charges set forth in Exhibit III, BASIS OF COMPENSATION.
- B. When message detail is entered on a magnetic tape or data file for provision of message detail to LSP, a per record charge will apply for each record processed. SWBT will determine the charges based on its count of the records processed.

IV. LIABILITY

- A. Except as otherwise provided herein, neither party shall be liable to the other for any special, indirect, or consequential damage of any kind whatsoever. A party shall not be liable for its inability to meet the terms of this Agreement where such inability is

caused by failure of the first party to comply with the obligations stated herein. Each party is obliged to use its best efforts to mitigate damages.

- B. When the Recording Company is notified that, due to error or omission, incomplete data has been provided to the LSP, the Recording Company will make reasonable efforts to locate and/or recover the data and provide it to the LSP at no additional charge. Such requests to recover the data must be made within 30 days from the date the details initially were made available to the LSP. If written notification is not received within 30 days, the Recording Company shall have no further obligation to recover the data and shall have no further liability to the LSP.
- C. If, despite timely notification by the LSP, message detail is lost and unrecoverable as a direct result of the Recording Company having lost or damaged tapes or incurred system outages while performing recording, assembly and editing, rating, message processing, and/or transmission of message detail, the Recording Company will estimate the volume of lost messages and associated revenue based on information available to it concerning the average revenue per minute for the average interstate and/or intrastate call. In such events, the Recording Company's liability to the LSP shall be limited to the granting of a credit adjusting amounts otherwise due from it equal to the estimated net lost revenue associated with the lost message detail.
- D. The Recording Company will not be liable for any costs incurred by the LSP when the LSP is transmitting data files via data lines and a transmission failure results in the non-receipt of data by the Recording Company.
- E. The LSP agrees to defend, indemnify, and hold harmless the Recording Company from any and all losses, damages, or other liability, including attorney fees, that it may incur as a result of claims, demands, or other suits brought by any party that arise out of the use of this service by the LSP, its customers or end users. The LSP shall defend against all end users' claims just as if the LSP had provided such service to its end users with its own employees.
- F. The LSP also agrees to release, defend, indemnify and hold harmless the Recording Company from any claim, demand or suit that asserts any infringement or invasion of privacy or confidentiality of any person(s), caused or claimed to be caused, directly or indirectly, by Recording Company employees and equipment associated with provision of this service. This includes, but is not limited to suits arising from disclosure of any customer specific information associated with either the originating or terminating numbers used to provision this service.
- G. The LSP also agrees to release, defend, indemnify and hold harmless the Recording Company from any claim, demand or suit to perform under this contract should any regulatory body or any State or Federal Court find the existing terms of this contract to either be illegal, unenforceable, against public policy, or improper for the Recording Company.

The attached pages of this Exhibit I show the service options that are offered under this Appendix and the charges that are associated with each option. Alphabetical and numerical

references in the CHARGES columns are to rates and charges set forth in Exhibit III, BASIS OF COMPENSATION.

EXPLANATION OF SERVICE OPTIONS

ORIGINATING 1+ DDD RECORDINGS - IXC TRANSPORTED MESSAGE DETAIL AND ACCESS USAGE RECORDS

- Option #1:** SWBT performs recording, assembly and editing, rating of billable message detail and creates an Access Usage Record (AUR) for all 1+ Interexchange Carrier (IXC) transported messages originating from LSP end office telephone network and forwards both billable message detail records and AUR records to LSP.
- Option #2:** SWBT performs recording, assembly and editing of the billable message detail and extracts that detail to the IXC for all 1+ IXC transported messages originating from LSP end office. SWBT creates Access Usage Records for this traffic and forwards those AUR records to LSP.
- Option #3:** The Interexchange Carriers do own billable message recording for their 1+ IXC transported messages originating from LSP end office. SWBT performs recording for Access purposes only, assembles and edits this data, creates AURs and forwards the AUR records to LSP.

ORIGINATING OPERATOR RECORDINGS - IXC TRANSPORTED MESSAGE DETAIL AND ACCESS USAGE RECORDS

- Option #4:** LSP Non-Equal Access End Office - The Interexchange Carriers do their own billable message recording. SWBT performs local and intraLATA operator services for LSP. SWBT performs recording at the operator switch for all 0+, 0-, Coin Sent Paid, CAMA and International IXC transported messages. SWBT assembles and edits this data, creates AURs and forwards the AUR records to LSP.
- Option #5:** LSP Equal Access End Office - The Interexchange Carriers do own billable message recording. SWBT performs local and intraLATA operator services for LSP. SWBT performs recording at the operator switch for 0- only IXC transported messages. SWBT assembles and edits this data, creates AURs and forwards the AUR records to LSP.
- Option #6:** LSP Equal or Non-Equal Access End Office - Interexchange Carriers do own billable message recording. LSP chooses to have SWBT purchase source information from IXC in order to have information required to create Access Usage Records. SWBT assembles and edits this data, creates AURs and forwards the AUR records to LSP.
- Option #7:** Interexchange Carrier does [its?] own billable message recording and forwards to SWBT the billable message detail for assembly and editing and rating of these operator service IXC transported messages. SWBT forwards the rated billable message detail to the appropriate billing company, creates an AUR and forwards the AUR records to LSP. This situation occurs when the LSP has not signed a rating takeback waiver with the Interexchange Carrier.

800 RECORDINGS - IXC TRANSPORTED MESSAGE DETAIL

- Option #8:** SWBT performs SSP function for LSP end office and bills query charge to the appropriate Interexchange Carrier. SWBT performs recording for Access purposes only, assembles and edits this data, creates AURs and forwards AUR records to LSP.
- Option #9:** SWBT performs SSP function for LSP end office. LSP performs billing of query charge to the appropriate Interexchange Carrier. SWBT performs recording at the SSP for Access purposes only, assembles and edits this data, creates AURs and forwards AUR records to LSP. SWBT performs recording at the SCP for query billing purposes only, assembles and edits this data, creates SCP records and forwards SCP records to LSP.
- Option 10:** SWBT performs SCP function for LSP. SWBT performs recording at the SCP, assembles and edits this data, creates SCP records and forwards SCP records to LSP.

TERMINATING RECORDINGS - IXC TRANSPORTED ACCESS USAGE RECORDS

- Option 11:** SWBT provides tandem function for LSP. LSP requests SWBT to provide all Feature Group B, Feature Group C and Feature Group D terminating usage recordings including Feature Group B over D and Feature Group C over D. SWBT creates terminating AURs for this data and forwards AUR records to the LSP.
- Option 12:** SWBT provides tandem function for LSP. The LSP requests SWBT to provide all Feature Group B terminating usage recordings excluding B over D. SWBT creates terminating AURs for this data and forwards AUR records to LSP.
- Option 13:** SWBT provides tandem function for LSP. LSP requests SWBT to provide all Feature Group B terminating usage recordings including Feature Group B over D. SWBT creates terminating AURs for this data and forwards AUR records to the LSP.
- Option 14:** SWBT provides tandem function for LSP. LSP requests SWBT to provide all Feature Group D terminating usage recordings including B over D and C over D. SWBT creates terminating AURs for this data and forwards AUR records to the LSP.
- Option 15:** SWBT provides tandem function for LSP. The LSP requests SWBT to provide all Feature Group D terminating usage recordings including B over D. SWBT creates terminating AURs for this data and forwards AUR records to the LSP.

MESSAGE PROVISIONING:

- Option 16:** SWBT will forward all IXC transported message detail records or access usage records to LSP generated internally within SWBT system or received via CMDS from an Interexchange Carrier or another Local Exchange Carrier telephone

company. LSP forwards rated IXC transported message detail or access usage detail to SWBT for distribution to the appropriate billing company through SWBT's internal network or using the CMDS network.
